Miyachi Europe Offers Advanced Data Analysis Monitor (ADAM) – Resistance Welding Production Monitoring for Process Accountability

[Miyachi Europe](#), the leading supplier of laser and resistance welding systems and laser marking products, announces the availability of its new Advanced Data Analysis Monitor (ADAM), the most advanced resistance welding monitor available from any manufacturer. ADAM is easily integrated into automated systems, and offers more of the information manufacturers need for process development, production monitoring, and data to support ISO, GMP, TQM and regulatory requirements for traceability to NIST standards.

The Advanced Data Analysis Monitoring tool measures current, voltage, force and displacement. It has an easy to set up interface with a large monitor and high resolution sensors. ADAM shows production run screens, histogram and process results, allowing users to collect valuable data historically and monitor production continuously, including parameter recommendations for future settings.

Representing the very latest technology in resistance weld monitoring, ADAM is fully integrated with a modern PC infrastructure, facilitating the importing and exporting of data. Sophisticated SPC capabilities, such as the integrated database and Minitab 15® statistical software, support the ever-increasing emphasis on process accountability.

For more details on Miyachi Europe's competencies in systems, please visit our website at <http://www.miyachieurope.com/products/system/>

About Miyachi Europe

Miyachi is the market leader in developing, building and servicing machines and components for laser welding, laser marking, resistance welding, hot bar and systems. Miyachi solutions are an integral part of the production process to connect, to join, to automate, to identify or to customise components in a very reliable and very sustainable fashion. Miyachi products are in use in a variety of modern high-tech application fields. These application fields are our areas of expertise to the benefit of our customers' and our vendors' future growth in Automotive, IT & Multimedia, Electronics/Solar Cells/Batteries, Medical, Aerospace, and Defence. www.miyachieurope.com.
