History

While the MIYACHI Corporation was founded in Japan in 1972, the company's European history stretches back over 100 years to the formation of PECO in Germany in 1908. In 1995, UNITEK was integrated into the MIYACHI Corporation, and in 2001 the company's activities in the Netherlands were renamed to UNITEK EAPRO. MIYACHI Europe and PECO merged in 2005. This new organisation joined with UNITEK EAPRO in 2008 to form the **MIYACHI Europe Corporation**.

Company Profile - About MIYACHI Europe

MIYACHI Europe is the market leader in developing, building and servicing machines and components for laser welding, laser marking, resistance welding, hot bar and systems. We provide solutions that are an integral part of the production process to connect, to join, to automate, to identify or to customise components, and our broad product range allows customers to use the best technology for their application.

MIYACHI Europe also provides feasibility testing, extended application development (consulting), optimisation of process parameters, process qualification and on-site trouble shooting through our well-equipped laboratories, as well as a sample handling service to determine the suitability of one of our technologies for a particular application. We also offer installation, training, maintenance and repair services for all our products and systems through the experienced and knowledgeable European technical team.
