Miyachi Europe Displays Studwelding, Dispensing, Hot Bar Reflow Soldering, and Resistance Welding at Welding Week Trade Show

[Miyachi Europe](#), the leading supplier of laser and resistance welding systems and laser marking products, will be showcasing its studwelding, dispensing, hot bar reflow soldering, and resistance welding capabilities and products in Booth #C1013 at Welding Week 2011 in Antwerp, Belgium from October 18-21, 2011.

Available for demonstration will be Miyachi Europe's studwelding solutions, a form of arc welding where several capacitor batteries are discharged across an accurate calibrated tip of the welding rod. The solutions are widely used in insulation, shipbuilding, and engine construction applications.

Miyachi Europe will also display PAR 3C – a two-component dispensing robot – ideally suited for mixing two liquids accurately and dispense it in the required cycle rate and volume.

Also on display will be a hot bar reflow soldering equipment, ideal for applications in which components require a very precise positioning, including connecting flex foils to printed circuit boards, small wires, small coax cables and very light or small components. Miyachi Europe hot bar reflow soldering products are designed especially for hot bar soldering of flex circuits, TAB and flexible connectors onto PCB.

Miyachi Europe will also be exhibiting its resistance welding capabilities, ideal for such applications as connectors, cables, lighting components, battery tabs, and sensors in the automotive, electronics, solar cells, medical and aerospace industries. A unique AWS3 resistance welding system for saw blade applications will be on display at booth#C1013 at Welding Week 2011.

About Miyachi Europe

Miyachi is the market leader in developing, building and servicing machines and components for laser welding, laser marking, resistance welding, hot bar and systems. Miyachi solutions are an integral part of the production process to connect, to join, to automate, to identify or to customise components in a very reliable and very sustainable fashion. Miyachi products are in use in a variety of modern high-tech application fields. These application fields are our areas of expertise to the benefit of our customers' and our vendors' future growth in Automotive, IT & Multimedia, Electronics/Solar Cells/Batteries, Medical, Aerospace, and Defence. www.miyachieurope.com.
